

モーターサイクル技術開発の方向性

Direction of motorcycle technology development

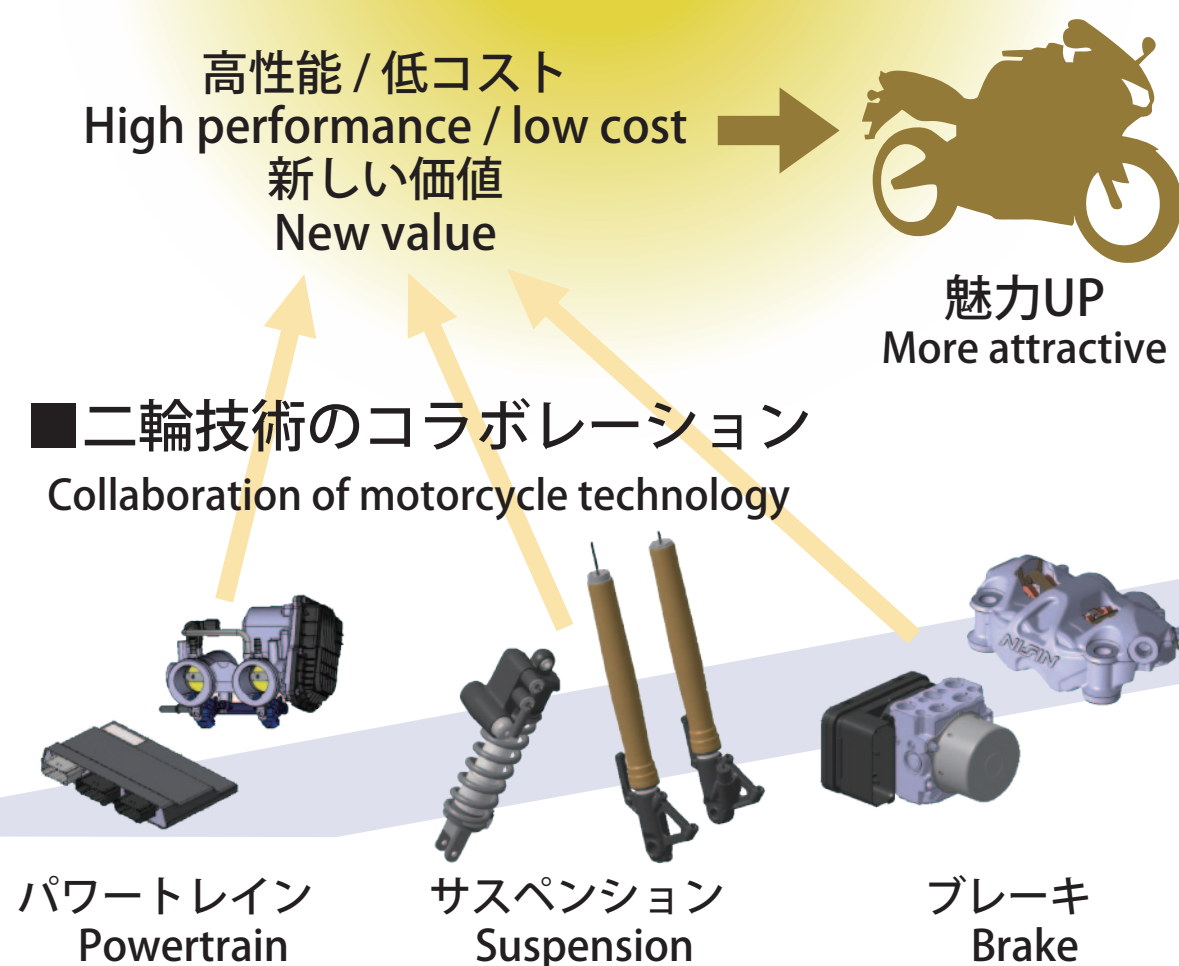

走る・止まる・曲がるの先進技術を融合したシステム商品で
多様なニーズに応え、人々のQOLを向上させる

Improve people's quality of life by responding to their diverse needs with system products that integrate advanced technologies for driving, stopping, and turning

短期 Short term

Astemoが保有する技術のコラボレーション
による、新しい価値の創出や従来製品の進化

Astemo creates new value and evolves conventional products
through the collaboration of Astemo-owned technologies.

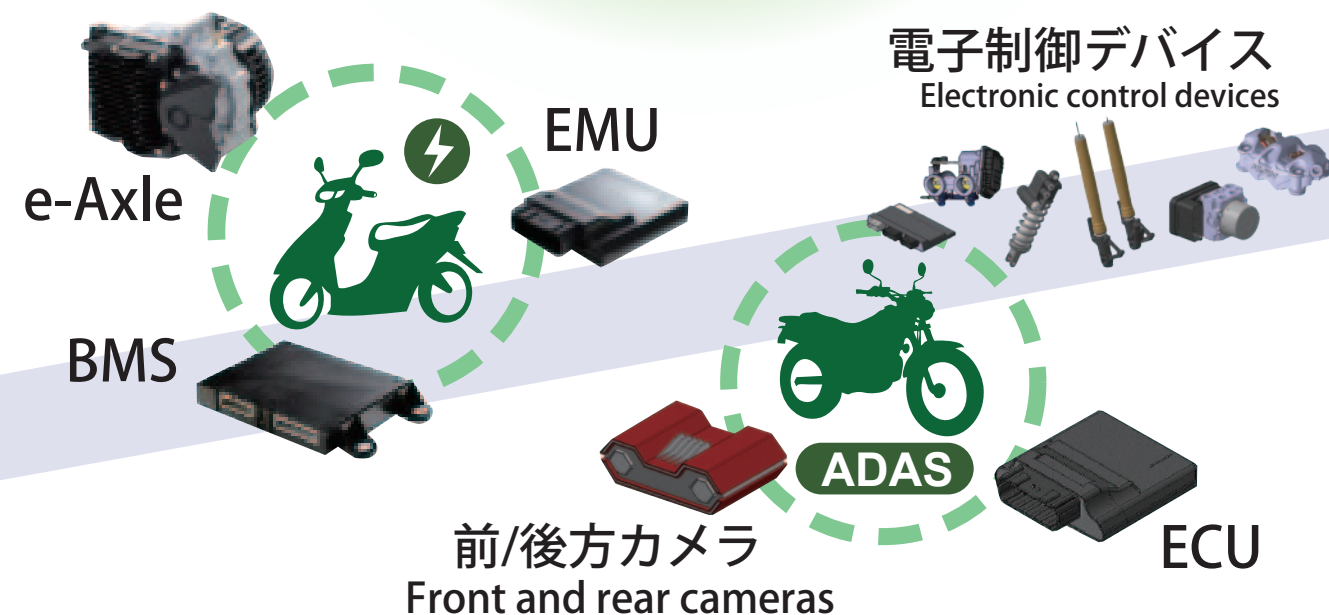

中期 Medium term

EVバイクの普及や安全ニーズの高まり
に対して、小型・廉価なシステム製品
の提供で対応

Astemo responds to increased safety needs and the spread
of electric bikes by providing compact and low-priced
system products.

■小型車両へ搭載しやすいEVソリューション
EV solutions that are easy to install on small motorcycles

■死亡事故を減らす二輪ADAS技術
ADAS technology for motorcycles to reduce fatal accidents

長期 Long term

環境にやさしく安全で、人々のQOLを向
上させる二輪モビリティの実現に、進化
したAstemoのソリューションが貢献

Advanced Astemo solutions contribute to the realization of
two-wheeled mobility that is environmentally friendly, safe,
and improves people's quality of life.

■QOL向上に貢献するAstemoソリューション
Astemo solutions for improving quality of life
